Filed : December 12, 2003

#### AMENDMENTS TO THE SPECIFICATION

**Please replace paragraph [0058] on page 9 of the Specification as filed with the following paragraph:**

A DCD antiserum was raised in rabbits for the immunohistology, using as antigenic determinant the peptide KENAGEDPGLARQAPKPRKQRSSL (SEQ ID NO: 7) which was coupled to KLH for T-cell stimulation. The antigenic determinant corresponds to the amino acid sequence 42-65 from the DCD peptide. It emerged from the investigated skin sections that there was intense staining of the eccrine sweat glands, but no expression on other skin cell types.
